EMOTIONAL BLUEPRINT

The Energy in Motion wheel

Name the feeling. Let it move. Turn it into something new.

1 · Find it

Start in the middle with the main emotion, or find the word that fits on the inner rings. Every flavour links back to its root.

2 · Feel it

Where is it in your body? How loud is it, 0–10? Loud means process it in your body first. Quiet means reframe it.

3 · Move it outward

Past the dotted line is what that energy becomes once it's integrated, through processing and ECT. Outside is integrated, inside is held in.
